

**PREPARATION FOR:  
MOSQUITO CONTROL**

**IN ORDER TO PROVIDE A THOROUGH TREATMENT TO REDUCE THE CURRENT INFESTATION WE WILL NEED YOUR COOPERATION. YOUR COMPLIANCE WITH THE FOLLOWING INSTRUCTIONS WILL ENSURE THE MAXIMUM EFFECTIVENESS OF THIS TREATMENT. THE TECHNICIAN WILL PERFORM A MOSQUITO CONTROL TREATMENT TO THE EXTERIOR LANDSCAPING. IF YOU REQUIRE ASSISTANCE, PLEASE CONTACT YOUR LANDLORD.**

1. Close all windows and doors while the treatment is being performed.
2. Cover all exterior food processing surfaces and utensils during treatment or thoroughly wash before use.
3. Cover or remove exposed food left outside.
4. Remove yard debris, leaf litter, cut back vegetation away from the foundation.
5. Keep a minimum distance of 30 feet away from the technician during the application process.
6. Do not touch the treated areas (landscaping).
7. Do not wash or rinse the treated areas (landscaping).
8. If rain is predicted within 24 hours, the treatment may be rescheduled.
9. If the wind is over 15mph, the treatment will be rescheduled.
10. Persons with medical conditions should consult their physician prior to treatment.

**The mosquito control service is intended to reduce the mosquito population. The professional material used starts working immediately and continues to work up to 30 days. We are not permitted to re-apply the mosquito control product more than once every 14 days. You must allow time for the material to work.**
